

Chapter 6 – Personal Identification Number (PIN) for IRD e-Services

6.1 Introduction

A **Personal Identification Number (PIN)** is a secure authentication credential issued by the **Inland Revenue Department (IRD)** that enables registered taxpayers to access the **IRD e-Services Portal**. While a **Taxpayer Identification Number (TIN)** identifies a taxpayer, the **PIN** allows the taxpayer to securely log in and use online tax services.

Only taxpayers who have successfully obtained a TIN can apply for a PIN. Without a PIN, taxpayers cannot access most online services provided through the IRD e-Services Portal.

6.2 What is a PIN?

A Personal Identification Number (PIN) is a unique security code issued by the Inland Revenue Department after a taxpayer has successfully registered for a TIN.

The PIN is used to:

- Access the IRD e-Services Portal.
- Authenticate the taxpayer's identity.
- Protect taxpayer information.
- Enable secure online tax transactions.

The PIN is confidential and should only be known by the taxpayer or an authorized representative.

6.3 Why is a PIN Required?

A PIN is required to perform various online tax-related activities through the IRD e-Services Portal.

These include:

- Logging into IRD e-Services.
- Registering for tax types.
- Filing tax returns.
- Viewing taxpayer information.

- Updating taxpayer profile details.
 - Managing tax registrations.
 - Authorizing staff or tax agents.
 - Accessing other electronic tax services.
-

6.4 Eligibility for Obtaining a PIN

Only registered taxpayers are eligible to obtain a PIN.

Applicants must first:

1. Register with the Inland Revenue Department.
2. Obtain a valid Taxpayer Identification Number (TIN).

Once a TIN has been issued, the taxpayer may request a PIN through the IRD e-Services Portal or by visiting an IRD office.

6.5 Methods of Obtaining a PIN

The Inland Revenue Department provides two methods for obtaining a PIN.

Method 1 – Online PIN Request

Applicants may request a PIN through the IRD e-Services Portal.

The process is as follows:

1. Visit the IRD website.
2. Open **e-Services**.
3. Select **Access to e-Services**.
4. Choose **PIN Request**.
5. Enter the required reference number.
6. Provide personal details.
7. Submit the request.

After verification, the IRD processes the application and sends the PIN by post to the taxpayer's registered address.

Method 2 – In-Person PIN Request

Applicants may also visit:

- IRD Head Office
- Any Regional Inland Revenue Office

The applicant should submit:

- National Identity Card (NIC) or Passport.
- Letter of authorization (for company representatives where applicable).
- Supporting identification documents.

The IRD officer generates the PIN and provides it in a sealed PIN Mailer.

6.6 Information Required for Online PIN Request

During an online PIN request, the applicant is generally required to provide:

For Individuals:

- TIN or National Identity Card Number

For Companies:

- Company Registration Number (ROC)

In addition, the applicant must provide:

- Full Name
- Mobile Number
- Email Address

After completing the application, the request is submitted electronically.

6.7 Receiving the PIN

Once the request is approved:

- The IRD generates a PIN.
- A PIN Mailer is prepared.
- The PIN Mailer is sent to the taxpayer's registered postal address.

If the PIN Mailer is not received within approximately two weeks, taxpayers are advised to contact or visit the nearest IRD office.

6.8 First Login After Receiving the PIN

When accessing the IRD e-Services Portal for the first time:

- Enter the TIN.
- Enter the system-generated PIN.
- Complete the login process.

For security reasons, the system requires the taxpayer to **change the system-generated PIN** during the first login.

The taxpayer cannot continue using e-Services until a new PIN has been created.

6.9 Changing the PIN

The Inland Revenue Department requires taxpayers to replace the system-generated PIN with a new personal PIN.

The new PIN must satisfy the system's minimum security requirements.

Once changed:

- The old system-generated PIN becomes invalid.
 - Only the newly created PIN can be used for future logins.
-

6.10 Forgotten or Lost PIN

If a taxpayer forgets the PIN:

- A new PIN request should be submitted online, or
- The taxpayer may visit an IRD office to request a replacement PIN.

Every new PIN request generates a completely new PIN.

Any previously issued PIN becomes invalid immediately after the new PIN is generated.

6.11 PIN Security

Taxpayers should take appropriate measures to protect their PIN.

The IRD recommends:

- Do not share the PIN with other individuals.
- Store the PIN securely.
- Change the PIN periodically.
- Avoid writing the PIN where unauthorized persons may access it.

Maintaining PIN confidentiality helps protect taxpayer information from unauthorized access.

6.12 Account Lockout

For security reasons, the IRD e-Services Portal locks an account after **five consecutive incorrect login attempts**.

When an account is locked:

- The taxpayer cannot access e-Services.
- A new PIN may need to be requested if the PIN cannot be recalled correctly.

This security measure helps protect taxpayer accounts from unauthorized access.

6.13 Common Issues and Solutions

Issue	Possible Solution
PIN Mailer not received	Wait up to two weeks; if still not received, visit the nearest IRD office.
Forgot PIN	Request a new PIN online or at an IRD office.
First login unsuccessful	Ensure the system-generated PIN is entered correctly before changing it.
Account locked	Follow the IRD procedure to obtain a new PIN or seek assistance from the IRD.
Previously used PIN rejected	Only the most recently created PIN is valid.

6.14 Best Practices

Taxpayers are encouraged to:

- Keep their mobile number and email address up to date.
- Ensure their registered postal address is accurate to receive the PIN Mailer.
- Change their PIN periodically.
- Log out after using the IRD e-Services Portal.
- Use a supported web browser when accessing the portal.
- Avoid multiple incorrect login attempts.

6.15 Key Points

- A **PIN** is required to access IRD e-Services.
- Only taxpayers with a valid **TIN** can obtain a PIN.
- PINs can be requested online or by visiting an IRD office.
- The system-generated PIN must be changed during the first login.
- Every new PIN request invalidates all previously issued PINs.

- Accounts are locked after five consecutive incorrect login attempts.
- Taxpayers should keep their PIN confidential and update it periodically.
